

TECHNICAL DATA SHEET

NATUR'FINE PRESTIGE

FORMULATION

Preparation of specific yeasts hulls and purified pectolytic enzym

FIELD OF APPLICATION

Product dedicated to qualitative white, rosé and red wine fining.

APPLICATION RATE AND DIRECTIONS FOR USE

Dosage: 5 a 40 g/hl (maximum legal dosage in Europe 40g/hL)

The dosage will be defined following the advice of your consultant or after fining tests in laboratory.

Dissolve Natur'Fine in 5 to 10 times its weight in water. Then, incorporate the mix during pump over for tank or stirring for barrels.

SPECIFICATIONS

Aspect	Poder	Arsenic	< 1 ppm
Colour	Light beige	Aerobic mesophile bacteria	< 5000/g
Humidity	2 to 6 g/100g	Sulphite reducing Clostridium	< 10/g
Ash	5 – 10 g/100g	Coliforms	< 10/g
Nitrogen	5.5 – 7.5g/100g	Heavy metals	< 30 ppm
Protein	35 –45 g/100g	Staphylococcus aureu	abs./g
Carbohydrates including cell envelopes	37 –48 g/100g	Salmonella	abs./25g
Lead	< 2 ppm	Escherichia coli	abs/25g
Cadmium	< 0.5 ppm	Yeast and mould	< 102/g
Mercury	< 0,15 ppm		

STORAGE

Store in original packaging in a fresh, dry and odourless room.

Use quickly after opening

Respect the Optimal date of use: 3 years after packaging.

PACKAGING

1 kg bags in 10 kg boxes

**IN ACCORDANCE WITH THE CURRENT INTERNATIONAL OENOLOGICAL CODEX –
FOR OENOLOGICAL USAGE FOR THE ELABORATION OF PRODUCTS
INTENDED FOR DIRECT HUMAN CONSUMPTION**
